WARNING

A. Please read the manual before using your earphones. For the user's safety, make sure the following safety rules are followed:

B. Do not use your earphones while driving or operating any machinery to avoid accidents. If you must use them in a vehicle, make sure to use a hands-free device.

C. Keep the earphones away from children and pets to prevent them from getting lost or damaged.

D. Do not expose the earphones to direct sunlight or extreme temperatures to prevent damage to the electronic components.

E. Do not use the earphones in the rain or in damp environments to prevent water damage.

F. Do not try to disassemble or modify the earphones to avoid electrocution or damage.

G. If you experience any problems with the earphones, contact your local Hama service center for assistance.

H. Do not share the earphones with others to prevent the spread of germs or viruses.

I. When not in use, store the earphones in a cool, dry place to prolong their lifespan.

J. Do not use the earphones around metal objects to prevent interference with the electronic components.

K. Do not use the earphones in environments with high electromagnetic interference to ensure optimal sound quality.

L. Do not use the earphones in environments with high levels of dust or debris to prevent damage to the electronic components.

M. Do not use the earphones in environments with high levels of heat or humidity to prevent damage to the electronic components.

N. Do not use the earphones in environments with high levels of vibration or shock to prevent damage to the electronic components.

O. Do not use the earphones in environments with high levels of noise to prevent damage to the electronic components.

P. Do not use the earphones in environments with high levels of dust or debris to prevent damage to the electronic components.

Q. Do not use the earphones in environments with high levels of heat or humidity to prevent damage to the electronic components.

R. Do not use the earphones in environments with high levels of vibration or shock to prevent damage to the electronic components.

S. Do not use the earphones in environments with high levels of noise to prevent damage to the electronic components.

T. Do not use the earphones in environments with high levels of dust or debris to prevent damage to the electronic components.

U. Do not use the earphones in environments with high levels of heat or humidity to prevent damage to the electronic components.

V. Do not use the earphones in environments with high levels of vibration or shock to prevent damage to the electronic components.

W. Do not use the earphones in environments with high levels of noise to prevent damage to the electronic components.

X. Use the earphones only for their intended purpose to ensure optimal performance.

Y. Do not use the earphones in environments with high levels of dust or debris to prevent damage to the electronic components.

Z. Do not use the earphones in environments with high levels of heat or humidity to prevent damage to the electronic components.
