Display-Schutzfolie
Screen Protector Foil

1. Installation Instructions and tips for attaching the screen protector

Thank you for choosing the Hama screen protector! For optimal results, the screen protector must be attached correctly and carefully. Take your time and read the following instructions and information completely, then proceed by step.

1. Explorative Symptoms and swore

| Warning | The self-adhesive screen protector is not suitable for special screens, such as touchscreens.

Note: This information serves as a guide and is not intended to be exhaustive.

2. Package Contents

- Screen protector (5 pieces)
- Installation kit: screws, screwdriver, installation guide
- User manual (optional)
- Screw (optional)

3. Installaziton instructions and preparations

- Select a room with as little light as possible to perform the installation (instance the bathroom).
- Use a clean, lint-free cloth surface. Always apply the screen protector in a well-ventilated area.
- Lay out the super-ready sticky side of the screen protector on a flat surface. Make sure the screen protector is not touched by fingerprints.
- Screw the installation kit into place, making sure the screws are not too tight. If you are unsure about your installation kit, contact the manufacturer.

4. Attaching the protector

- Remove the first sheet of protective film from the adhesive side of the screen protector. Make sure the protective film is 100% stuck on the glass before removing it.
- Be sure to follow the installation kit instructions carefully. Always apply the screen protector to the glass gently and evenly. The screen protector should be applied as close to the glass as possible. Remove any air bubbles using a microfiber cloth.

5. Support and maintenance

- If you have problems or questions, contact Hama Customer Support by phone or email.
- We offer a comprehensive warranty and support service.

6. Overview of the installation

- Screen size: [Screen size]
- Screen type: [Screen type]
- Screen resolution: [Screen resolution]

7. Preparation of the screen

- Ensure that the screen is clean and free of any dust or residue. Use a clean, lint-free cloth.
- Use a screen cleaner specifically designed for your screen.

8. Glueing the screen protector

- Ensure that the protective film is fully stuck to the glass before removing it.
- Apply the screen protector to the glass gently and evenly. Remove any air bubbles using a microfiber cloth.

9. Troubleshooting

- If the screen protector is not sticking properly, ensure that the protective film is completely removed. If the screen protector is not sticking to the glass, ensure that the glass is clean and free of any residue.

10. Additional information

- The screen protector is designed for use with current and future screen sizes. It is made of high-quality materials and is suitable for use in all environments.
