USB-Ladegerät

USB Charger

Operating Instructions

USB Charger

This charger was specifically designed for devices that are powered via USB connector such as MP3 players, smartphones, tablets, laptops, and other USB-powered electronic devices. When this charger is used, these devices can be charged or operated at a power of 5 A (5.0 A).

Before using, ensure that the intended output current does not exceed 5.0 A (5.0 A). If the output current is exceeded, the charger will not function correctly.

If you notice that the charger emits a noise or feels warm to the touch, it may be due to an overload. Please reduce the number of devices connected to the charger to ensure proper operation.

The maximum output range of the charger is 5.0 A (5.0 A). Depending on the power consumption of the connected device, it may be necessary to reduce the number of devices connected to the charger to ensure proper operation.

Using the operating instructions expedites safety, improves efficiency, and prolongs the service life of the charger. It is recommended that you read these instructions before using the charger.

Using the charger improperly may result in damage to the charger and/or the connected device. It is important to follow the instructions carefully.

Follow the safety guidelines provided to ensure the safety and longevity of the charger.

Ensure that the intended output current of the charger does not exceed 5.0 A (5.0 A).

In the event of any problems or questions regarding the charger, contact the manufacturer for assistance.

Auto mode: The USB charger automatically adjusts the output power according to the connected device's power consumption.

Battery: The battery is recharged when the device is connected to the charger. The battery level is indicated by the LED indicator.

USB-Checker

USB-Checker (for Apple devices)

USB-Checker is an application developed specifically for Apple devices. It can be used to test whether an Apple device is compatible with a USB connector. This application is useful for ensuring that the device is properly connected to the USB connector.

For Apple devices, the USB-Checker can be downloaded from the Apple website. The application is compatible with iOS devices and can be used to test compatibility with various USB connectors.

By using the USB-Checker, you can verify the compatibility of your Apple device with a USB connector. This ensures that the device is properly connected and functioning correctly.

In summary, the USB-Checker is an essential tool for Apple device owners to ensure compatibility and proper connection to USB connectors.
