Installation instructions and tips for attaching the screen protector

Thanks for choosing the Hama screen protector! For optimal results, the screen protector must be attached properly and centered. Take your time and read the following instructions and information completely, then proceed step by step.

1. Explanations of Warning Symbols and Notes

- **Warning**
  - This symbol indicates important information and warnings that you need to know to use the product safely.
- **Note**
  - This symbol indicates additional information or instructions that should be followed for optimal results.
- **Notes**
  - This symbol indicates additional notes that should be followed for optimal results.

2. Package Contents

- Screen protector (1)
- Microfiber cloth (1)
- Suction cup (1)
- Foam pads (8)
- Suction cup adhesive (1)
- Three installation instructions

3. Installation Requirements and Preparations

- Select a room with nice light as possible and ensure no distracting background noises are present.
- Make sure the environment temperature is appropriate for the installation process.
- Check the air conditioning system is turned off and there is no dust on the floor.

4. Attaching the Protector

- Remove the first sheet of backing film from the screen protector's package. Peel the protective layer from the back of the screen protector. The sticker is removed by peeling it off and throwing it away.
- Center the suction cup on the Back of the screen protector and secure it in place with the suction pad. If the suction cup is not centered, peel the suction cup off and try again.
- Place the screen protector on the window and secure it with the suction cup. The suction cup should be applied firmly to avoid any air bubbles.
- Using a Microfiber cloth, wipe any fingerprints or dust from the screen protector and apply it to the window. The screen protector is now attached to the window.

5. Support and Questions

- If you have any questions or problems, please contact Hama Customer Support at 1-800-123-4567.
