**The bracket is designed for a maximum weight of 20 kg — it allows you to mount it flat on a wall. First mount the wall plate using the wall anchor washers and mounting screws. If necessary, purchase the fastening material appropriate for your TV from specialist dealers. Connect the wall bracket and the TV afterwards.**

**Safety warning:**
For optimum mounting, please use this bracket fitted by a qualified technician! Please check that the wall is complete before you fit it, and make sure that none of the parts are faulty or damaged. Use the bracket for the intended purpose only. Before installing the bracket, ensure that the wall on which the television is to be mounted is suitable for the weight and make sure that no electrical wires, water, or gas pipework are located around the installation location. Please note in particular the following:

- If the provided wall anchor washers are only approved for concrete and brick walls. If the wall on which the television is to be mounted is made of other materials you should buy appropriate installation material from a specialist dealer. Also observe the necessary safety clearance around the TV set (depends on the model). The bracket may not be mounted at too high locations where persons could stand. Once you have mounted the bracket, check that they are sufficiently secure and safe to use. You should repeat this check at regular intervals (at least every three months).**

---

**The halterung is an in-car/maximally strong of 20 kg and can be used for flat wall mounting. Mount the wall plate using the wall anchor washers and mounting screws.**

**Safety warning:**
To avoid damage resulting from improper mounting or any damage risk, please use this bracket fitted by a qualified technician! Please check that the wall is complete before you fit it, and make sure that none of the parts are faulty or damaged. Use the bracket for the intended purpose only. Before installing the bracket, ensure that the wall on which the television is to be mounted is suitable for the weight and make sure that no electrical wires, water, or gas pipework are located around the installation location.
