The bracket is designed for a maximum weight of 10kg - it allows you to mount it flat on a wall. First mount the plate wall using the wall anchors and wall screws. Now, mount the left and right carrying arm on your TV. Use the provided mounting screws, washers and spacers. If the sites you have selected are not suitable for your TV, select other wall anchors or special screws. Connect the wall bracket and the TV as shown in the illustrations.

Safety warning: For proper mounting, please have this bracket fitted by a qualified technician! Please check that the sites is complete before installation and ensure that none of the parts are faulty or damaged. Use the bracket for the intended purpose only. Before installing the bracket, ensure that the wall on which the television is to be mounted is suitable for the weight and that all the wall anchors, securing the TV to the wall, are appropriate. Also observe the necessary safety clearance around the TV set (depends on the model). The bracket may not be mounted at too high locations, where persons could stand. Once you have mounted the bracket and the flat screen, check that they are sufficiently secure and safe to use. You should repeat this check at regular intervals (at least every three months).

Hama GmbH & Co.KG provides no warranty coverage and is not liable for damage resulting from improper mounting or any damage resulting thereon.
